

The —Black —Crack —Report

The addiction you don't want to fight

Issue 20, October 2010

Upcoming Event Our Final 2010 Event:

- **Putnam Park October 23rd & 24th, 2010 (Sat/Sun)**
 - Our regular 3 group event with up to 3.0 hours of available track time each day!
 - Instructors will be provided for Novice drivers and weather permitting, we will also be holding our practice race starts for the Advanced Group Drivers.
 - 1 or 2 day registrations available while single day openings last.
 - Come on out for the last 10/10ths event and one of the last events at Putnam Park this year.

Registration for this event is open at www.1010thsmotorsports.com

Some 2011 Schedule Notes

I have scheduled my first track w/e for 2011.

- **April 2nd & 3rd, at Putnam Park**

I will be working on other dates and other tracks and will post them to the website as soon as I get them set up. I hope to have a successful 2011 and continue to build our driver base. There is also somewhat of a chance that BlueGrass Motorsports Park will open next year and 10/10ths will certainly be there. Keep your fingers crossed.

I am also in the very beginning stages of working with a local group in Greencastle Indiana to put on a charity track day event at Putnam Park to benefit Autism. This is a great cause and could turn out to be a very exciting event. We are discussing having various sponsors, many vendors etc. on site and possibly including a car show the day of the event. I may couple this with another 10/10ths w/e to make it a 3 day event. If anyone has any interest in helping or if you have experience with these kinds of charity events you would like to share, please feel free to email me at 1010ths@zoomtown.com

FOR SALE

I have a brand new, in the box set of DRM Coil Overs.

These are high quality, durable components to create top of the line, dependable suspension kit packages. All of DRM's coilover and Sport shock kits start from Bilstein shock absorbers. Bilstein has built their reputation using shocks featuring a superior, patented monotube gas charged design that allows heat to transfer and dissipate more efficiently. The shock can then maintain full damping characteristics as temperatures rise. Their quality and durability in turn make DRM suspension kits shine. DRM employs Hyperco Springs which have proven themselves to the racing world time and again to be effective shock absorbing components. The shocks and springs are the meat and potatoes of any suspension setup and Bilstein and Hyperco offer a great value without compromising quality.

This kit fits all C5 / C6 Z06, Z51, ZR1 and other optioned cars.

New, these are \$1795.00 + Shipping. Asking \$1450.00 (This includes shipping) Email me for details
